CELEBRATING
50 YEARS
1969-2019

S. Himmelstein and Company will be celebrating OTC's 50th anniversary in booth 715 from May 6-9, 2019 in Houston, TX at the NRG Center. Stop by and see what's new!

Steve Tveter and Cyndi Rude will be present and ready to discuss your torque measurement applications and requirements with you. They look forward to seeing you!

How Using a More Precise Torquemeter Can Often Save Time and Money

Himmelstein

Tech Memo

Read this **Technical Memo** from Mr. Himmelstein to learn how using a precision torque sensor can reduce the quantity of torquemeters needed, lower cost, and improve test efficiency. Himmelstein's goal is to provide precision torque measuring systems that satisfy accuracy goals over a wide torque of range.

Meet Linda Saelens

We recently added Linda Saelens to our staff as an Administrative Assistant. She comes to us with over 9 years of experience in a manufacturing facility office. Linda has two teenagers so she'll know how to keep Steve and Cyndi in line. She's also available to assist you with your phone orders or to answer any general questions. We are very happy to have her with us.

Signal Conditioners and Sightings

Himmelstein is always looking toward the future. The upgraded Model 700+ Series Strain Gage Signal Conditioners, which you can configure to your own specifications, are now available. See more [here](#) and call us if you'd like additional information.
